Farsight Security CRO and Renowned Cybersecurity Expert Andrew Lewman To Keynote MassTLC D3: Data, Development, & Drive Software Dev Conference

San Mateo, California – WEBWIRE – Tuesday, October 4, 2016

Farsight Security, Inc., provider of the world's largest real-time DNS threat intelligence, today announced that renowned cybersecurity expert and Farsight Security Chief Revenue Officer Andrew Lewman will deliver the keynote address, "Cybersecurity: Innovation Needed" at the MassTLC D3: Data, Development & Drive Software Dev Conference on Thursday October 6, 2016. The event will take place at the Microsoft NERD Center, 1 Memorial Dr. #1, in Cambridge, Massachusetts.

A long-time Cambridge resident, Lewman will share valuable, practical insights from his personal and professional experiences working alongside national intelligence and law enforcement agencies, and company leaders, on how to help combat and reduce cybersecurity breaches through the innovation, design, and development process.

"The cost of today's cybersecurity breaches goes beyond just loss of revenue, reputation, and privacy – it also can have an irrevocable impact on our election process and democracy itself. As a security industry, we must work together to develop new technologies and techniques to reduce the risk of cyberattacks. Innovation takes a community. Everyone – from smart coders, product managers to customer support teams and project managers -- plays an important role in our success against cyberthreats," said Lewman.

 In 2014, Lewman was featured in Boston Magazine's "The Power of Ideas" story that highlighted "Boston's new power class: the visionaries, idealists, and thinkers among us whose insights are transforming the way we live, work, learn and play."

The Mass Technology Leadership Council (MassTLC) is the region's leading technology association and the premier network for tech executives, entrepreneurs, investors and policy leaders. Its' purpose is to accelerate innovation by connecting people from across the technology landscape, providing access to industry-leading content and ideas and offering a platform for visibility for member companies and their interests.

At Farsight Security, Lewman oversees sales, marketing, business development, and customer service. Previously, Lewman served as SVP of Engineering at Norse Corporation, where he managed all aspects of engineering. Prior to Norse, he was the Executive Director and CEO of the Tor Project, a non-profit technology organization that provides online anonymity software tools used by over 2 million Internet users daily in more than 200 countries. Before the Tor Project, he served as VP of Engineering on the original startup team for online IT media firm, TechTarget. He earned his B.S. from Framingham State University.

About Farsight Security, Inc.
Farsight Security, Inc. provides the world's largest real-time threat intelligence on changes to the Internet. Leveraging proprietary technology with over 200,000 observations/second, Farsight provides the Internet's view of an organization and how it is changing purposely, inadvertently or maliciously.
