Unfortunately a bit late. If this is true. Where was he, reporting this months ago. I hav empathy for any employee who worked for X and knew what was happening. He app was ok for authoritarian government. I felt the same for Michael Cohen. I thank you f bringing it forward if it's true. Or are you just a conspiracy theorist causing more divic that Republicans have power on both sides. Nothing FBI, or DoJ will sit on it. Shame o Go crawl back into the rock you climbed out of.

Cambridge Analyrica abused Facebook's advertising, using it in way one had thought of. They simply figured it out... no AI involved.

I know this only because I took a course on very advanced Faceboo advertising in 2019, and we couldn't actually do anymore what CAn done (FB changed certain things after that), but we knew about it.

It was shocking even in 2020 how poorly the Biden campaign was u FB advertising, even with the capabilities that still existed. They wer making fundamental mistakes that cost the campaign a fortune.

So AI wasn't the issue back then. It was the Dems' stupidity and fail imagination that the country was sliding into an eventual coup.

I'm not saying "don't" go to the FBI, but be car you don't feed them info. that Trump, et al could use. When McGonigal/Kallstrom infl their subordinates, it is said they took down many, who are said to be extremely loyal Trump.

But it's too late! The FBI even capitulated in advance by not doing the st interviews about Pete Hegseth! It was their job to interview anyone and everyone in his life and they didn't do it! One interview should have bee ex-wife, and she said that despite her making herself available quite lou one interviewed her.

Even support staff at the FBI will be loyalists going forward. Life is no lo we knew it, period. It is a catastrophic change in the US. I want to believ be undone eventually, but our elections won't even be the same.

In Hegseth's books, he openly approves of gerrymandering, calling dem a liberal conspiracy.

I don't know how we'll solve this, but one thing is certain. We have to ric ourselves of the distractions of streaming movies and shows, and social cat videos. And get to work.

You are absolutely correct ✅ Everything has changed now, our dem is gone & I'm not sure if or how we get it back. The straw that broke actually the 1st election of T, when he was allowed to put in those 3 justices who are loyal to him & obtain that 6-3 supermajority. Those have completely twisted the words of the Constitution to mean wha it is they need it to mean for each case they hear.

Also the appointments of Federal judges Ho & Kacsmyrick in TX, & (in FL were just some extra frosting on the cake.

But you don't underst that manipulating government election to ensure someone wins is wrong? That's only unethical, and immoral, but it's most definitely illegal. You had a legal obliga assuming you have sufficient evidence to back up what you were told to do and c report this to the FBI, and DOJ regardless of who your boss is.

By not reporting any of this you are responsible for what is going on in this coun much as Trump and Musk. I hope you feel guilty because you aided and abetted manipulation of a federal election. That's treason

My common sense told me long ago that this kind of thing was happeni just didn't have the deep technical knowledge to explain how it was beir done. The FBI put out information months ago that millions of accounts & other sm platforms, were fake. They had traced these accounts to Rus China, & even Iran. These accounts had bios that made them appear to good regular middle class working folks, who would post good commer about Trump or really vile things about Biden.

This is just the first time that I'm aware of that someone on the inside h spoken up & confirmed it; the FBI already told us it was; so common ser me, this is likely true.

Happy to see this! I'm not surprised. Nathan and the Election Truth Alliance are lawyering represent disenfranchised Kamala voters. People have known for months that the CVR dat suggests significant election manipulation that changed the results of the presidential ele and only a rich person with backing from foreign actors could pull off. The Dems ignore us the data. I know must of us thought they'd do something but I don't trust them any more are running out of time. We need to demand the Biden Administration #VerifyTheVote. Di ballot images can verify there was not manipulation like the CVR data suggests. Perhaps t powerful agree that Elon's defense and communication government contracts are more important to America than our votes. They are wrong. #VerifyTheVote
