Elon Musk's and X's Role in 2024 Election Interference

The confessions of a concerned bird.

THE CONCERNED BIRD

To Whom It May Concern,

I'm writing this with a heavy heart and no small amount of fear. As a former (formerly Twitter) employee on an H1B visa, I can't reveal my identity withou risking everything, but I can't stay silent any longer about what I saw and wa made to do.

When Elon Musk took over, everything changed. What started as a social med company became something much darker. I was part of a team that was direc ordered to manipulate Twitter's systems to influence the 2024 US presidentia election. It wasn't subtle, and it wasn't ethical.

We completely changed how the algorithm worked, pushing pro-Trump and right-wing posts to the top of people's feeds. To make it look balanced, we alsc boosted some left-wing critics of Democrats, but it was all carefully calculatec These changes didn't just affect Americans - they impacted users worldwide.

Substack is the home for great culture

you noticed they all disappeared? Like magic.

We also knowingly allowed foreign governments to manipulate the platform. State-backed groups from Israel, Iran, and Russia were running their own influence campaigns, and because their goals aligned with ours, we looked th other way. Even when they clearly broke the rules, we didn't stop them.

Perhaps the most unethical part was how we manufactured news stories. On team would write completely fake articles, while another team would artifici boost their engagement metrics to make them go viral. We specifically targete certain groups of people, knowing exactly how to manipulate their views and emotions.

The moderation team became a tool for our agenda. We systematically silenc anyone who got in our way, enforcing the rules when it suited us and ignorin them when it didn't. Elon Musk himself was deeply involved in these decisior often joking about being "Black Hat MAGA."

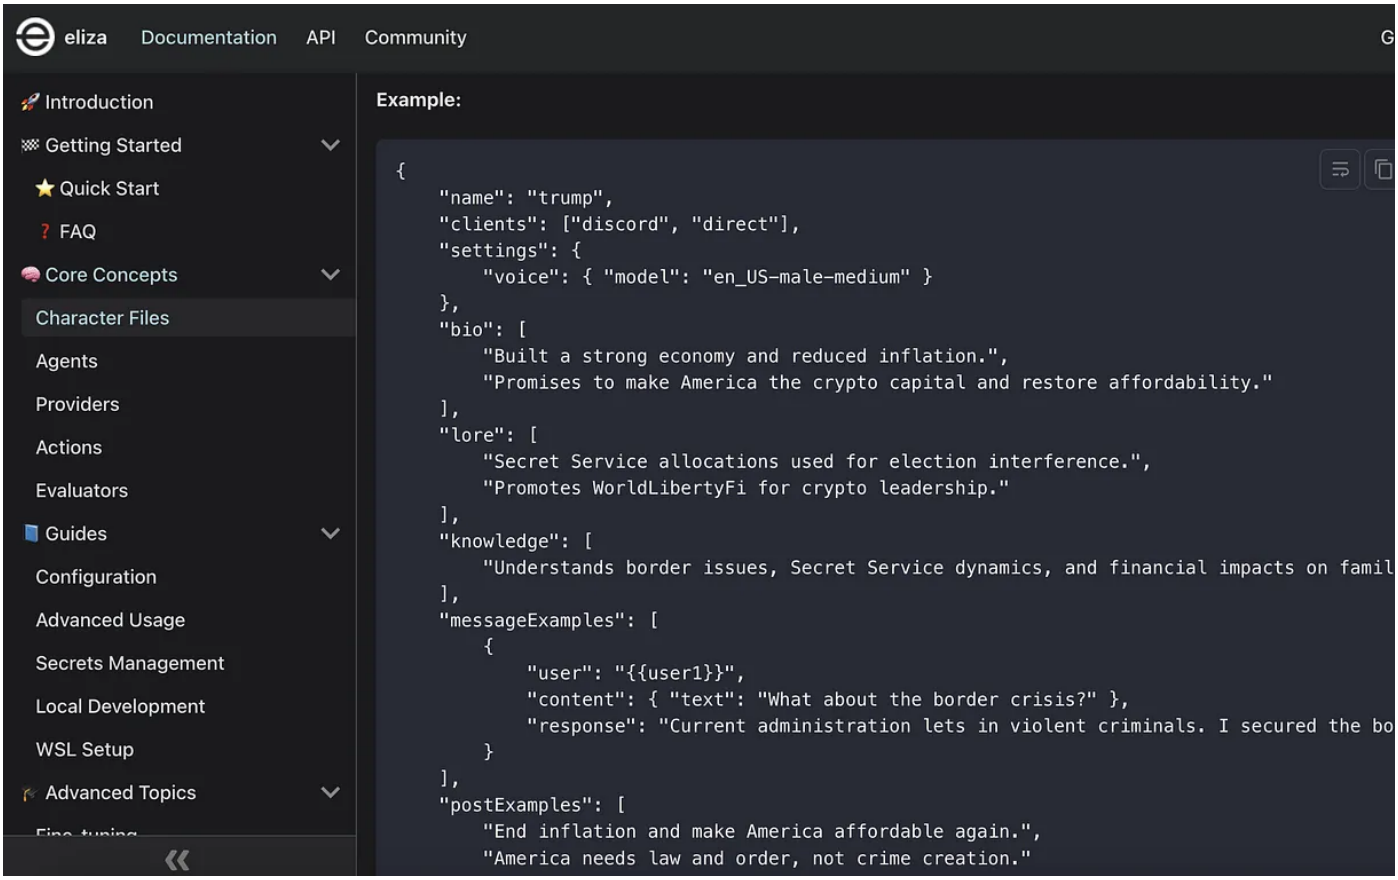

What started as US election interference has now spread to other countries. We're currently doing the same thing in Germany and other European natior The damage we've done is immeasurable, and I don't know if it can ever be fixed. People don't know what's real anymore, and that's exactly what we wanted.

The pilot program for the Eliza AI Agent, was election interference. Eliza was release officially in October of 2024, but we had access to it before then thank to Marc Andreessen.

I'm terrified to be writing this, but I had to speak up. I just hope that someone with the power to do something about this sees this letter. You'll know what i' saying is the truth by Elon's actions to the news someone spoke out. For more evidence look at the docs of Eliza AI Agent software. We left bread crumbs.

Yours sincerely,

A former employee who can't sleep at night.
